Temagami's New Grocery Store: A Work in Progress

By Elaine Gunnell, with Dick and Joanne Van Manen

Our Daily Bread, the new grocery store in Temagami, started off slower than planned this first summer, but owners Dick and Joanne Van Manen are not unduly worried. While the actual opening happened later than they had hoped, the plan was to start off simple and then expand the services offered.

This summer was a big learning curve, according to Joanne. However with the first summer now behind them, Dick explained that the seasonal slow down will give them time to get really ready for next summer. They are looking forward to the fall and winter being a chance to organize and do price comparisons. The biggest struggle, they explained, was in finding the right suppliers and keeping the right products on the shelves.

Dick and Joanne Van Manen, with their daughter Heather and Joanne's father, Evert Krygsman, cut the ceremonial ribbon at Our Daily Bread's grand opening. Photo: E. Gunnell.

Temagami Water Quality Monitoring: the First Season

By Ted Tichinoff

While the goal remains important, indeed vital, and although much energy and effort was applied, the water quality testing and monitoring turned out to be more complicated than any of us expected. In hindsight I remember one of the environmental engineering groups we contacted saying, "You intend to do this with volunteers? That's interesting."

The plan was that the lake could be divided into sectors and volunteers in the various sectors could do the testing in their area. Over the winter our environmental consultant, Story Engi-

neering out of Haileybury, selected and mapped over 40 logical (deep) and relevant sites on the lake (a blown up copy of their map can be seen at the TLA building) for phosphorous and oxygen testing. An orientation session was conducted by Story with volunteers in May.

Phosphorous would be tested by a lake sampler at Siekki depth and 75% of total depth (phosphorous sinks) with oxygen testing by an oxygen probe at every metre up to 20 and then every 5 metres (the probe gives temperature as well – it is startling on a hot July day to see and feel how cool the lake is at its

deep points). The key testing period is just after the ice is out and we'd hoped to do a full testing in May.

However, we realized that with one set of testing equipment and the pressure of doing the entire lake in roughly the same time frame, that groups of volunteers would not work. It would have to be 2 or 3 testers in one boat. But with each site on Temagami taking up to 40 minutes (deeper sites take longer and as we all know this is a deep lake) plus travel the undertaking was massive.

That could have been overcome by

Membership Survey Gives Clear Direction To TLA Priorities Part III: Taking Samples

By Will Goodman

The results of the recent membership survey have been tallied and it is clear that three top priorities have emerged: Defense of the Temagami Tenets, Taxes, and Water Quality. Nearly 150 members responded to the survey, which was mailed to all members and was also available directly on the TLA web site.

Not surprisingly, environmental issues were seen as most important to the majority of respondents. 66 percent of respondents listed Water Quality as the number one priority. 84 percent identified the Defense of the Tenets as a top priority, which is also related to the environment and overall lake experience.

Virtually 100 percent support the

current ban on the sale and development of crown lands on lake Temagami due to its status as a naturally maintained lake trout fishery. Furthermore, 85 percent support the restrictive development policies in [place within] the Official Plan and the Zoning By-Laws, even if they restrict what you can do on

2nd Vice President: Gerry Kluwak

Treasurer: David McFarlane

Directors: Pete Calverley
Will Goodman
Chip Kittredge
Boyd Matchett
Justin Metz

*The term of office for a Director is 3 years.
Elections are held every year in the summer.*

President's letter

What an amazing summer we have had in Temagami! Sunny day after sunny day, the occasional rain to hold off a fire ban, and even the lake levels were back to normal! While I didn't get to spend as much time at the cottage as I would have liked, those in my family who were lucky enough to have spent more time (or should I say have worked hard to earn the time!) didn't hesitate to let me know just what I was missing!

Though the Lake did seem to be less busy this year, this was certainly not the case with the TLA. All the hard work of TLA staff, Board and members led to huge milestone accomplishments such as the creation of a water quality monitoring program and the release of Pam Sinclair's new TLA history book. 2011 also saw the expansion of the campsite clean-up program and a jaw-dropping \$6,500 was raised at the Flea Market! I'd personally like to thank all members for your continuing support and participation with our association. Without each and every one of you, the projects and events would not be possible, but perhaps more important, Lake Temagami as we have enjoyed it for yet another summer would not be the special place it is today.

I'd also like to thank our Board of Directors: our newest Directors Will Goodman and Justin Metz for getting involved, Dave McFarlane and Ted Tichinoff for signing on for another three year term, and Chip Kittredge, Gerry Kluwak, Boyd Matchett, and Pete Calverly for all your hard work and for giving me the honour to serve as President for another year. I can honestly say that we have an excellent group of folks representing you as we look ahead to 2012. I should mention that we are also always looking for new Directors. Keep this in mind for next year. It would be great to get new folks involved, and hopefully some women too!

Lastly I thank those who had a chance to fill out the TLA Members Survey. This feedback is essential in determining what's important to you as we plan our programs and budget allocations for next year. As always, don't hesitate to contact me with your ideas, comments or concerns.

All the best,
Andrew Healy, President

The TEMAGAMI TIMES welcomes signed letters or emails on any subject.

The editor reserves the right to edit for length, clarity and relevance. Letters containing libelous remarks, personal attacks or inaccurate information will not be published nor will open letters or copies of letters sent to public officials or governments. SKYLINE RESERVE

The mainland surrounding Lake Temagami and Cross Lake is to be zoned as a landscape ecology zone to preserve the beauty, restore the integrity and preserve the wilderness aspect of the Temagami Forest. This ecology zone would consist of 2 reserves which would be protected from natural disturbance e.g. fire and insect infestation, but would have separate management goals and prescriptions.

The two reserves would be the following:

1. Skyline: The Lake Temagami and Cross Lake reserves must protect any part of Lake Temagami or Cross Lake with no visual evidence to the naked eye that any activities such as timber cutting or mining have taken place. The minimum dimension would be 200 metres. It would be preserved in its natural state and its permissible uses would be very limited.

TENETS FOR TEMAGAMI

2. Ecological Buffer Reserve: This would surround the skyline reserve to protect the natural forest and wildlife habitat ecosystems of the Temagami region. It would have a broader range of controlled activities but no new public roads would pass through it except in the village of Temagami.

ROAD ACCESS

The current ban on construction of new public road access points to Lake Temagami

and Cross Lake is supported by our three groups. We define the existing public road access points to consist of the village waterfront, Finlayson Park, Strathcona Landing and the Lake Temagami Access Road landings. We agree that, where possible, parking areas must be screened from the main body of the Lake. Shiningwood Bay, Cross Lake, Austin Bay, Blue Bay and any other illegal access points are to be closed using scarification methods. Existing gates are to be maintained and new

ones are to be installed to prevent new public access roads to Lake Temagami and Cross Lake.

New ski-doo trails accessing Lake Temagami/Cross Lake are to be no wider than ten feet and for winter ski-doo use only. Proposals for these access points to Lake Temagami and Cross Lake are to be reviewed and sites inspected by the new governing body prior to construction.

MAINLAND DEVELOPMENT

There should be no mainland development on Lake Temagami and Cross Lake with the exception of those potential lots immediately adjacent to the Township of Temagami that are able to be serviced by the Township's central sewage treatment facility. All other future development will occur on islands, the number and location to be determined by the revised official plan which will be sensitive to current ecological standards.

Once More TLA Flea Market was a Great Success!

submitted by Debbie Nixon and Charlene Tamburro, Co-chairs of the 2011 TLA Flea Market

The summer has ended for TLA island residents with Mother Nature having provided everyone with a plethora of beautiful days.

Our annual TLA Flea Market on July 23, 2011 was well attended, with hundreds of lake residents and visitors intermixing and enjoying each other's company. As usual there was a pleasant din of background conversations and laughter as everyone had an opportunity to catch up with each other's lives and experiences.

All this transpired while they had the opportunity to view an abundant variety of items and to purchase assorted lake treasures at bargain prices. There was also a silent auction and fifty-fifty draw, which attracted many happy participants.

A total of \$6,500 was raised, which was directed to help pay for Water Quality testing equipment purchases and expenses incurred during 2011.

Once again members of the TLA responded wonderfully with their participation as volunteers in helping Debbie Nixon and Charlene Tamburro, the co-chairs of the event. Peter Healy ably assisted in coordinating the function and the vendors and donors were most generous with their contributions.

An event such as this is dependent on the participation of many volunteers and contributors. The volunteers who made this happen are as follows:

Flea table: organized by David and Linda Cain, assisted by John and Rose Heenan, Sandi and Debbie Russell, Casey and Terry Young, Jill Scully, Blake and Judy Stormes, Jim Hasler, Arthur Thompson, Rebecca Danvers

Super Fleas: Elodie Tichinoff, Lorna Cooper

Silent Auction: Denise Wert, Sandy Smith, Marty Banghart

Fifty-Fifty Draw: Susan McFarlane, Eve Lewis

Hot dog Stand: Temagami Barge: Biff and Carol Lowery, Pat Delarosbel

Bake Table: Robin Campbell assisted by Gloria Allen and Vince Hovanec

Chicken sandwich stand: Linda and Tom Pace

Noodle sales: Taylor Scott and Sarah Wert

Boat traffic control and shuttle: Ted Tichinoff, Pete Calverley and Tom Rowe

Setup and Cleanup crews: Pete Calverley, Ray and Andrew Banghart, Phil and Sadie Bury, Alistair Avard, Tuz Gooderham, Shelly Timms, John and Sandy Russell

Book Stand: Claire Rainnie, Tim Roach

Executive Director and MC: Peter Healy

Accounting: Sandy Nixon

Report Composition and editing: Rocco Tamburro M.D. (retired)

We also thank the following donors:

Dock Plus, Bill Kitts, Molly Goal, Camp Wabikon, Robyn Campbell, Gloria Allen, Steve Drake, Northland Traders, Don McMillan of Century 21, David and Linda Cain, Orient Gardens, Subway – Petro Canada, Hair Den, Clearwater Builders, Shelly Timms, Tea and Treasures, Temagami Shores, Embroidery Hoop, Temagami Water Systems, Temagami Marine, Victoria Wilde, Lakeland Airways, Wild Flower Motel, Pier Market, Peacock Furniture, Keewadin Camp, Wanda Niemi, Ontario Public Service, David and Susan McFarlane, Scotiabank Harley Fry, Steve and Sandra Hartman, B and D Burger Stand, Tuptim on the Lake, Temagami Electric, Ray and Marty Banghart, Kirk Smith, Temagami Outfitting Company, The Dagostrinos, Big House Cleaning – Tracy Manderstrom, Temagami Barge, Churchill's Restaurant, Burrows Marine, Kennedy Insurance Brokers, Bay Produce, Temagami Trucking, Temagami Station Restoration Trust, One Stop Trading post, Near North Embroidery, Loon Lodge, Temagami Ambulance

Private Vendors: Bella Hill Maple Syrup; Smoothwater Outfitters: Caryn Coleman; Art Photos by Morrison; Victoria Wilde: massages; Steve Snake: artist; Hugh McKenzie: artist

Once again thanks to all who participated and supported this year's event. Have a great remainder of the year everyone!!!

TLA President Andrew Healy addresses members at the 2011 AGM. Photo by: Trish Healy

Highlights of the Temagami Lakes Association's 80th Annual General Meeting

The 80th Temagami Lakes Association Annual General Meeting was held at Camp Wabun on Friday July 29th, 2011.

For those members who missed the TLA's Annual General Meeting, here are selected highlights of the event adapted from the draft minutes. (Full draft minutes are available on the TLA website at: <http://www.tla-temagami.org/meetings.html>).

Greetings and Opening Remarks

TLA president Andrew Healy began the meeting with a short reading from Chapter one of Pam Sinclair's book, *Temagami Lakes Association: The Life and Times of a Cottage Community* then thanked the Directors of Camp Wabun for hosting the meeting.

Councillor Paul Middleton, repre-

senting The Municipality of Temagami, commented on the Official Plan Review, which should be completed before the end of the summer. Councillor Middleton commented on the town's budget process in 2011 which resulted in a decrease in the budget of approximately four percent. Council is meeting often with the Temagami First Nation Band Council.

Chief Roxanne Ayotte of the Temagami First Nations provided an update on the projects that will be underway on Bear Island including the new Administration Office Building and a new Elders Complex, which is scheduled to begin in the spring. Chief Ayotte commented on the Land Claim, which

TLA Archives in the Cloud?

A major goal of the TLA Archives Committee is to enter the digital age. Creating a cloud version of the Archives would make them secure and available. A cloud archive would make it possible for TLA members to actively participate in the formation of the Archives and in the preservation of Lake history by uploading their own island history, family biographies, photos and videos.

The members of the Archives Committee are: Angus Scully, Pam Sinclair, and Biff Lowery.

As we explore the future of the Archives we would love to hear from TLA members who have knowledge of suitable software or storage services that we should consider using. Please contact the committee through ascully@sympatico.ca.

Comments on Taxation

By Boyd Matchett

These comments were made at the TLA Annual Meeting on July 29, 2011

Most taxation discussions are complex and our Temagami Municipal Taxes are no exception. So I will try and keep my comments to generalities and not overwhelm you with too many numbers!

Many, may have noted in the fall/winter edition of the Temagami Times* that our new mayor, John Hodgson, in a letter reply to our TLA letter, also quoted, stated quite categorically that no municipal taxpayer should be billed in 2011 for more dollars than in 2010.

In my view, at the time, a rather bold yet encouraging prediction, certainly for Lake Temagami property owners whose tax assessment values would again rise on average by 20-25%! When, around mid June after a lengthy process the fi-

nal budget numbers and tax rates were fixed, the results came reasonably close to meeting this originally stated target; but many tax payers, particularly waterfront property owners would still end up paying a small increase of around 1% over last year, on the property portion

of their taxes.

However, the separate Education Tax portion, set by each individual School District under Provincial guidelines, was again increased for waterfront properties because of their higher assessed property values – despite an ef-

Editor's note:

Mayor Hodgson's letter appeared in the Winter 2011 edition, commencing on page 9 and concluding on page 13. Past editions of the Temagami Times can be found on the TLA website at www.tla-temagami.org/Publications.html.

Sample tax bills *

*** Note: Not all properties in the same neighbourhood will see the same increase or decrease in their total bill. This is dependent on the assessed value of the property and the percentage increase in assessment on the particular property. These sample bills are randomly selected properties that are representative of typical or average examples for that neighbourhood.**

**water/sewer/grinder/garbage pick-up where applicable

fective lower tax rate of roughly 3% on this portion of the overall municipal tax.

Now let us refer to the handout statement, "sample Tax Bills", which provides a random sampling of individual property assessments, one for each type of neighborhood within the municipality. The Lake Temagami sample is the column on the right side and the three columns on the left represent the different Town, or Urban, neighborhoods. You will note on the Lake Temagami sample, which probably represents the lower median of Lake property values that the property tax increase in 2011 is \$25.26, whereas the Education Tax portion is \$77.98.

However, what is most revealing and may be a surprise to most of us, is that the various Town properties' total tax amounts are very comparable to the Lake waterfront tax levels, when area specific user fees are added. When consideration is given to the Town's much lower property values and the low household average annual income, which according to Statistics Canada in 2009, was approximately \$ 20,500, one can only assume that these property owners taxes are pretty "maxed" out!

You should also note that the "Towns" waterfront properties, although limited in number, are paying proportionately even more taxes per assessed value than our Lake properties. The Temagami South properties pay a special sewage grinder fee of approximately \$450 per year, which raises substantially their user fees! This year User Fee chargers approximately cover all area-specific, infrastructure operating costs, which has not been the case previously.

We should assume from this information that there is limited scope to add to their operating user fee costs, additional fees to cover the capital infrastructure costs as proposed by the Ministry. It would now seem apparent that under the present system low income communities with a small permanent population, such as Temagami, cannot afford to support the imposed ever increasing

Notes:					
1. Gas Tax Revenue - \$57,300 for 2010 and \$57,300 for 2011 not included in the budget. In order to include these amounts in the budget we are required to allocate the funds to a pre approved expenditure.					
2. Transfer from Reserves - \$125,000 was transferred from working capital reserves.					
3. Transfer to Reserves - \$8,000 received for a sale of a vacant lot in Temagami North Trailer Park was transferred into reserves for capital projects.					

June 17, 2011

infrastructure costs without additional government financial assistance, as in the past.

If we turn now, briefly, to the second handout sheet providing a statement of the consolidated municipal 2011 Budget, one might conclude that the new

administration has done a reasonable job in achieving a balanced Budget in which projected operating expenditures matched anticipated reduced revenues.

However, on closer examination one can observe that this balance was really achieved by deferring many essential

capital expenditures, and secondly, benefiting from a large previous year's surplus, which in all likelihood will not again be repeated.

In particular, we note that no apparent serious reductions, or cut backs, were

Youth Representative is an Inspiration to TCF Board

By Victoria Grant,
Temagami Community Foundation Board

Boat traffic has slowed, there are fewer lights shining into the night. It is the turning of the seasons, and we are experiencing a fall as beautiful as was the summer. Leaves are beginning to turn and the cry of the loon is a dominant sound as those magical birds begin to gather for their migration south. The fall sunset offers a vivid clarity of light that is unique to this time of year; beautiful and bittersweet. As I write this article on The Temagami Community Foundation, I thought important to set the stage and get your focus on Temagami.

I would like to share some experiences of on our new board youth representative, Kendall White. Kendall is sixteen, from Bear Island and attends high school in North Bay. She travels daily from Temagami to North Bay. She

is an inspiration and a breath of fresh air to all of us at our directors' meetings. She is keen, engaged and lots of fun. Kendall joined us in March.

In May, Kendall with one other youth from Bear Island, Becca Metadawabin, travelled to the Community Foundations of Canada conference in Vancouver. They participated in a youth day and Kendall was selected to be one of the youth to present to a plenary session of 600 people. She brought honour and recognition to the Temagami Community Foundation.

Kendall was chosen as one of eighty for the Students on Ice Arctic Youth Expeditions 2011 (<http://studentsonice.com>), an incredible once-in-a-lifetime opportunity for her to expand her knowledge about the circumpolar world, and to gain a new global perspective on the planet, its wonders, and its present and future challenges.

The ship-and-land-based journey explored Iceland, Greenland, northern Labrador (Nunatsiavut) and the northern reaches of Nunavik, Canada. She travelled with 65 international high school students, 14 to 18 years old and a team of 45 scientists, educators, aboriginal elders, historians, artists, writers, innovators, leaders and polar experts.

At the Temagami Community Foundation Fish Fry in August, Kendall was our guest speaker. She showed us what she was capable of and how resourceful she can be. She faced what could have been an embarrassing situation with poise and grace. Just before she was to speak, one of our community people stole the show by engaging in a somewhat deplorable display of bad judgment. I apologize to those of who witnessed the event. You however heard Kendall's response. "Hello, I am Kendall White...Twain. I'm going to start off with this quote; I think it may have been Shakespeare. I may be wrong but... 'What's in a name?' I don't think your name should define who you are; I think it is our actions. So please don't define me by my name but by my actions."

Kendall went on to speak for a half an hour. She shared her experiences of the trip, she entertained us by making us laugh, engaging with her and sharing the passion she felt for her experience. She took all of us in the audience

on the trip with her as she relived her memories, vivid in her mind and in her communication to us.

She closed by asking us where we thought she might want to go to next, and she shared that she would like to swim with the sharks in Cape Cod, South Africa, and go to Antarctica. Her words, "I will get there, you watch" were an inspiration. She closed with two significant messages, she spoke about a person who did a presentation on "Eating your Elephant" and to quote Kendall, "Eat your elephant, go out there and live life. You can't see things ... on television, you have to experience things yourself. Things that you experience affect you deeply and change you; so go out there and live life." Her last message was to thank the Temagami First Nation for their support and to acknowledge the community of Bear Island for supporting the fundraisers that paid for her trip.

We at the Temagami Community Foundation are glad to have Kendall as our youth representative; she has lots to teach us, and she is excited to learn. The Temagami Community Foundation can be a vehicle to do many things. We are only limited by our collective imaginations and our commitment. Thanks you to those who came out to the Fish Fry and to all of who support the Foundation.

In 2012 the Art Camp celebrates 10 years, more to come on that.

Aids to Navigation – Protecting Our Buoys and Channel Markers

By Angus Scully
Chair, Marine Committee

Buoys and channel markers are important safety and traveling aids. The maintenance of the channel markers and lights on the lake is paid for from our property taxes. Boaters should keep an eye open for problems and report them. Call the Municipal offices at 705 569 3421. Usually the concern is ad-

dressed within 24 to 48 hours. In July and August you may also call the TLA on VHF radio to report a problem.

What to report:

- Buoy missing
- Buoy out of place
- Light not operating
- Part missing – for example the cone on a red buoy
- Damaged or defaced buoy.

Don't forget that the cones on top of the red markers are vitally important. In low light all markers may look black.

Also, some people are red-green colour blind. In these circumstances, the cone top on the red markers is vital.

Time for More Buoys?

When the Coast Guard was responsible for the aids to navigation, the TLA set out its own private (and legal)

markers on shoals that were not on the main navigation channels. Liability and maintenance issues related to these private buoys forced the TLA to abandon this practice.

Now that the aids to navigation are a municipal responsibility and paid for by us, is it time to have the current buoy system expanded to include the former TLA markers? Please e-mail e at ascully@sympatico.ca with your thoughts.

TEMAGAMI PUBLIC LIBRARY NEWS

by Shelley Rowland

What a wonderful summer we've had. It was nice to see so many of our summer residents and I hope all arrived home safely. We look forward to seeing you again next summer.

Autumn is perhaps my favourite time of year. I enjoy the colours and the cool crisp mornings and evenings. It's also great time to curl up with a good book (of course anytime is a great time to read). The following is a partial list of some of the titles we have recently acquired:

New Books

Adult Fiction: *Flash and Bones*/Reichs, *The Shattering*/Healey, *Dracula in Love*/Essex, *Still Missing*/Stevens, *The Debutante*/Tessaro, *The Forest Laird*/Whyte, *Born to Die*/Jackson, *God's Guest List*/MaComber, *Death of a Greedy Woman*/Beaton, *Body Work*/Paretsky, *Silent Witness*/North Patterson, *Kill Me If You Can*/Patterson, *My Lost Daughter*/Rosenberg, *Bedtime Story*/Wiersema, *The Good Daughters*/Maynard,

Westerns: *Left Hand of the Law*/West, *Summers' Horses*/Cotton

Non-Fiction: *Preserving: The Canning and Freezing Guide for All Seasons*/Crocker, *The Memory Place*/Bartok, *The Great Reset*/Florida, *The New Normal: An Agenda for Responsible Living*, *Choke: What the Secrets of the Brain Reveal About Getting It Right When You Have To*, *The Weather of the Future*/Cullen, *Deadly Devotion*/Sofios, *Guinness World Records 2012*, *Justice Miscarried (Canada)*/Katz

Large Print: *Happy Birthday*/Steel, *Prime Time*/Fonda (non-fiction), *Young Adult: Revolution*/Donnelly, *The NightMaries*/Poblocki, *Guardian of the Dead*/Healey, *Nevermore*/Creagh, *Blood Wounds*/Pfeffer

Junior Fiction: *Twelve Haunted Rooms of Halloween*/Pamintuan, *Dinosaurs In Action*/Stilton, *Grandpa Green*/Smith (a picture book exploring aging, memory and the bonds of family history and love), *Puppy Party*/Wilson, *That Fatal Night (Dear Canada series)*, *The Unwanted*/McMann

Junior Non-Fiction: *Garbage Helps Our Garden Grow: A Compost Story*/Glaser, *Survive Alive Series: Making Shelter, Finding Food and Water, Finding Your Way, Fire and Cooking*/Champion

Board Books: *Bear Feels Scared*/Wilson, *Superhero Potty Time*/DiCicco, *Princess Potty Time*/DiCicco

Story Time

Story Time will be held the second Tuesday of each month (excluding July and August) from 7:00 to 8:00 p.m. Crafts, a story, and a light snack are provided. This program is free of charge.

New to the Library

We have added some new items to the library thanks to funding from the provincial government. These include DVDs from The Great Courses. These are college level courses taught by top professors. Each course includes the DVD(s) and a course guidebook. We have the following titles:

- *Lifelong Health: Achieving Optimum Well-Being at Any Age*/Prof. Anthony Goodman,

- *The Nature of Earth: An Introduction to Geology*/Prof. John Renton,
 - *From Yao to Mao: 5000 Years of Chinese History*/Prof. Kenneth Hammond,
 - *Meteorology: An Introduction to the Wonders of the Weather*/Prof. Robert Fovell,
 - *The Foundations of Western Civilization*/Prof. Thomas Noble
 - *Our Night Sky*/Prof. Edward Murphy.
- Loan time on these items is 4 weeks and can be renewed.

Blue Sky Reads Canadian

The Blue Sky Librarians Network (of which Temagami Public Library is a member) and the Nipissing University Library presented a reading with Canadian author Jane Urquhart who read from her novel, *Sanctuary Line* on Wednesday October 12th at 6:00 p.m. in the university's new library. This was followed by a book signing and refreshments.

We hope to make this an annual event, focusing on Canadian authors.

Temagami's New Grocery Store continued from page 1

They have made every effort to source local suppliers as much as possible. They are also looking for the community's input on products desired. If you are looking for something in particular, they suggest that you ask and, if they can, they will try to stock it.

The decision to go with a completely independent store, and not one of the chain stores, was largely based on the fact that the chains limit the owner's decisions. This means the owners are less flexible to respond to the needs of the community.

Not being on a flyer program does make a difference to customers, however, so they are looking at doing their own. In the meantime, though, they are offering in-store specials. "Whenever we can get a good deal on something," Joanne added, "we pass on the savings."

Cost savings are being looked at on the operations side of the business as well. Energy is a big cost for the store, so the Van Manens are researching ways to be more energy efficient. Eventually they hope to replace the current open coolers with glass door coolers.

The long term plans are shaping up over time and it is somewhat

amazing how things have transpired so far, considering it is less than a year since the Temagami Co-op grocery store closed its doors. Owning a grocery store in Temagami had not been in Dick and Joanne's long term plans, but Joanne's parents live here, and they felt drawn to Temagami. They sold produce in Temagami's community market a few years ago, and were pleased with the town's response. However, it wasn't until the Chair of the town's Economic Development Advisory Committee, Debby Burrows, suggested that they consider filling the community's need for the grocery store that they had given it any thought. Being strong in their Christian faith and seeing how things fell into place, they really feel that the Lord has led them here.

Their faith is also the reason that the store is closed on Sundays. "At the beginning," Joanne explained, "people said we would never survive with closing Sundays, but now people appreciate the break in the week." She went on to say that it is especially good for the employees to have a day with their families. That day of rest has been needed by the owners too, since Dick, Joanne and their daughter Heather have been

very busy getting the store up and running, and will surely remain busy as they continue to move forward this fall.

They have recently started up the bakery and once again the delightful aroma of fresh baking is greeting customers as they walk in the door. The selection of fresh baked goods including breads, rolls, pastry and cookies, will gradually be increased and eventually the Van Manens would like to have pies baked fresh at the store as well.

The deli will also be opening and there will be a new deli feature. Hot, homemade soups and deli sandwiches will be available on a daily basis. To make this even more inviting, tables and chairs will be added, so that customers can stop and have lunch when they shop. The addition of specialty foods, particularly Dutch products, as well as vitamins and homeopathic products are long-term goals as well.

The Van Manens know that running a store is hard work and they are ready and willing to put in all the faith and hard work it takes to earn their daily bread and to provide the community with a source for their daily bread as well. The community is very fortunate to have them here.

Membership Survey continued from page 1

your lot.

Of equal interest to the membership is the notion that 86 percent of respondents feel that it is very important that the TLA to be involved in the governance of the town. With taxes such a high priority of the membership, it is clear that the membership is looking to the TLA to represent its interests at critical town meetings.

The area of communication came up as vital to the membership as well. Over 90 percent of those who responded to the survey feel that it is important for the TLA to have a physical headquarters,

while nearly 2/3 monitor and use Channel 68 on the marine band radio. Nearly 90 percent of those responding stated that they read every issue of the Temagami Times. A similar number have visited the web site over the past year.

Some other interesting findings from the survey include the fact that the majority of respondents planned on using services in town this summer. Also, nearly 2/3 of respondents were in favor of charging non-residents for use of the Access Road. Finally, the Corn Roast is popular with over 50 percent of respondents saying that they have

attended and plan to do so again in the future.

Following is a brief sampling of some of the comments and suggestions that were received:

- I think the web site should be the primary source for communications to the members and the entire community. A great way would be to tweet updates or send email. Instead of using paper, constant contact email is a great way to send out information and cheapo.
- Canoeists must use campsites. Why don't houseboats have

Membership Survey *continued from page 8*

specific locations to tie up instead of stopping anywhere they choose?

- The more quiet and solitude the better. Fewer large boats, assured cleaner water, and the continuation of the ban on sale and development of crown land would all be most welcome.
- Better police coverage at the remote parts of the lake (Baie Jeanne landing in particular) to ensure proper fishing rules, correct parking/camping and landing usage. If I could see some better police coverage (I think twice a week is perfectly reasonable during the summer months), I could feel a bit better about paying all these crazy taxes.
- Would be nice to have a laundry and grocery service! i.e. someone comes and picks up your laundry and a shopping list and returns in a day or two with your clean clothes and groceries. This would give me more time to enjoy the lake, so I don't have to spend a day going into town and/or hand-washing clothes.
- Taxation for services used. Without a doubt, the residents in town would object strongly to having to cover items such as sewage system rework

at cottage sites, yet the lake residents appear expected to cover a significant portion of the millions of dollars in infrastructure overhead the Municipality is facing. Suitable policing levels and some action to prevent the known repeat offenders from continuing to "play" on the lake.

- I enjoy reading the paper and think it should continue to focus on town and lake issues, especially concerning the financial concerns of the town, environmental issues regarding the lake, and the status of local businesses, e.g. the grocery store.
- The Times has improved enormously in the past 3-4 years. I would like to see more political and economic information on what the Town is doing with our taxes and what services they are providing the Lake Resident Tax Payers.

The TLA Board is reviewing these important results, and using them for guidance as we move forward towards the 2012 summer season. For a complete summary of response to the survey questions, including all open-ended text responses to questions, please see the TLA website.

Comments on Taxation *continued from page 5*

made in personnel, hours worked, or wages, such as experienced in these years of austerity, by the private sector and most other public sector jurisdictions.

Hopefully, now that our new Mayor and council have had the experience of this past year and perhaps a better understanding of the key issues, they will have the determination and motivation to achieve in this coming year, 2012 what had been promised this year, that no municipal tax payer should be billed for more tax dollars than last year, recognizing that waterfront properties in particular will absorb once again considerably higher property assessment values. Bearing in mind the backlog of differed or ongoing in-

frastructure capital costs and probably reduced Federal and Provincial grants, this will be a real challenge!

To conclude, our TLA Board's role will be to remain vigilant on these key issues facing the Municipality and to work with the Mayor and Council in achieving these difficult objectives.

Before closing I believe we all owe a debt of gratitude to our Secretary-Treasurer, Peter Healy, who under frequently difficult and hazardous conditions was able to attend most Council and Budget meetings this past winter and spring and ably presented, or defended, our views. We all thank you, Peter, for a job well done!

(See also *Municipal Budget* on page 14)

THAT'S SOME SERIOUS COVERAGE.

Maybe you close your cottage every winter. Or you're located on an island, does that mean you don't deserve proper insurance coverage? Of course not. Take a look at what Kennedy Insurance offers then give us a call.

- Personal property inspections can be arranged
- Coverage is available to non-residents of Ontario
- Complete a review of your existing insurance program
- Coverage can include vandalism, theft, collapse and bear damage
- Programs can include watercraft, snow machine and recreational vehicle coverage
- Specializing in remote and island access properties

Annual General Meeting continued from page 3

was sent to the Province but was rejected until three things were done first: their Membership Code, Economic Development Corporation and a Trust Fund. The Membership code has been sent to Indian and Northern Affairs Canada. Chief Ayoitte also mentioned that all lake residents are able to use the Bear Island Community Library and the computers there to access the internet.

Temagami First Nation Chief, Roxane Ayoitte addresses TLA members at the 2011 AGM. Photo by: Trish Healy.

TLA President Andrew Healy thanked Pam Sinclair for writing the book that represented over 100 years on the lake. He thanked all the volunteers that made the Flea Market possible. He told the crowd that there were a great number of residents that took the time to complete the 2011 TLA survey. In his remarks Mr. Healy mentioned concern of what the TLA status would look like over the next 10-20 years and the need to involve the younger generation both in membership and leadership roles.

TLA Business

Current TLA Directors and past TLA Presidents who were present were introduced. The minutes of the 2010 AGM were adopted and there was no business arising from the minutes. Treasurer David McFarlane reviewed the 2010 financial statement which showed an operation surplus of \$9,021 and year end investments of \$148,475. Resolutions were passed to approve the financial statements and to approve the actions of the Directors and Officers since the Commencement of the 2010 AGM.

Committee Reports

Natural resources: Andrew Healy

30 campsites have been cleaned as part of the TLA Campsite Clean Up and we are hoping to double that this year. The TLA in partnership with Project Canoe have built and installed three privies this year for these campsites and hope to do about 10 more before the end of summer.

Municipal Budget and Taxes: Boyd

Matchett

The Town's budget in 2011 decreased by about four percent. The result for Lake Temagami properties is an average increase, with assessment increases and education taxes accounted for, of about four percent. Mr. Matchett provided tax comparisons with the mainland properties in the village of Temagami and the lake properties. (See full text of comments and handouts on page xx.)

Water Quality: Ted Tichinoff

Ted's reported that lake water is in good condition. The TLA Board is still moving towards a water quality monitoring program that will help to identify water quality issues. The Board is considering hiring university students next year to test the water quality and perform other tasks over the course of the summer.

in the early spring or late fall. Mr. Gelinat told cottagers to report minor crimes and to think about getting trail cameras to limit the amount of crimes in this area. Al has provided his phone numbers so we can contact him immediately after an event is noticed.

Friends of Temagami

Bob Olajos made a presentation on behalf of Friends of Temagami. The group covers a large area and their mission is to preserve the wilderness of the Temagami watershed. Mr. Olajos mentioned that their Annual General Meeting will be held October 28th and 29th at Smoothwater.

Author of *Temagami Lakes Association: The Life and Times of a Cottage Community*, and TLA Member of the Year, Pam Sinclair signs copies of her book at the 2011 AGM. Photo by: Elaine Gunnell

Flea Market and History Book

Peter Healy thanked Debbie Nixon and Charlene Tamburro for being co-chairs of the Flea Market. This year the Flea Market raised between six and seven thousand dollars, which will be directed to the Water Testing initiative.

Pam Sinclair's new book *Temagami Lakes Association: The Life and Times of a Cottage Community* is now available to purchase at the TLA office.

Septic Smart

Rob Davis of Eco-Ethic soap products made a presentation on septic system maintenance that was both hilarious and full of great tips. A summary of these will be posted on the TLA website.

Annual TLA Awards

Peter gave many thanks to the Wabun Staff for hosting the TLA AGM. Claire Rannie received a Temagami Print for her

40 years of continuous family membership. Pam Sinclair was honored as TLA Member of the Year in recognition of her time writing *The Life and Times of a Cottage Community*. Andrew Healy was recognized for his service as President this year.

Other Business

Paul Middleton reminded the audience of a Public Meeting regarding a land use application on Lake Temagami to be held on August 11th, 2011th at 5:30 p.m. Peter Healy added that the TLA, with the use of a land use planning consultant, have already made a written submission regarding this application.

Lisa Tuckerman suggested that perhaps TLA membership fees could be increased by \$10 per year to fund the water quality initiative.

President Andrew Healy once again thanked the membership for their presence at this meeting and their ongoing support for the organization and welcomed all to stay for a buffet lunch.

The TLA welcomes the following new members for 2011.

Temagami Medical Centre and Family Health Team • Fall 2011 – COPD Program

Chronic Obstructive Pulmonary Disease (COPD) is a major respiratory illness in Canada that is both preventable and treatable.

The Importance of Prompt Diagnosis

Underdiagnosis of COPD remains a significant problem with many patients already having advanced pulmonary impairment by the time they are diagnosed.

Beginning September 14th, 2011 and every two weeks thereafter, a Respiratory Therapist (RT) will be at the medical centre providing chronic lung disease screening and assessment of breathing/coughing symptoms using spirometry testing.

Spirometry is a common and effective diagnostic test. It's painless and usually takes less than 10 minutes, although sometimes it is repeated after taking a puffer medication.

You will be asked to take in a big breath and then blow as hard and as long as you can into a machine. The machine

measures how much air you can blow out from your lungs and how fast you can blow it out. Spirometry is the most reliable way to test your lungs for COPD.

How to Prepare for the Test

- Do not take rescue medication 4 hours prior to testing, i.e. Ventolin, Bricanyl
- Do not smoke for one hour prior to testing
- Wear comfortable, loose fitting clothing
- If exercise induced testing is required, bring comfortable walking shoes
- Eat, drink and take all other medication as indicated

In addition to spirometry screening, the Respiratory Therapist will be able to provide instruction on better breathing techniques, effective inhaler technique, home oxygen testing and more.

If you are a smoker and, through this COPD screening program, you decide to quit smoking, the RT will refer you to our

STOP Program. Through this initiative, the Temagami Family Health Team will provide you with a comprehensive smoking cessation program that will include:

- Advising and assisting you at every encounter
- Offering you a tailored treatment course of over-the-counter Nicotine Replacement Therapy, at no cost to you, in combination with cessation counseling
- Following up with you at key milestones for relapse prevention
- Proactively linking you with further supports through the Smokers' Helpline.

Who Should be Screened?

The Canadian Lung Association has suggested that patients who are older than 40 years of age and who are current or ex-smokers should undertake spirometry if they answer yes to any one of the following questions:

1. Do you cough regularly?

2. Do you cough up phlegm regularly?
3. Do even simple chores make you short of breath?
4. Do you wheeze when you exert yourself or at night?
5. Do you get frequent colds that persist longer than those of other people you know?

If you have already been diagnosed with asthma or COPD, spirometry testing can be useful to determine if your current treatment is working.

The earlier spirometry is done, the earlier lung disease can be detected and treated. So show your lungs some love. Talk to your health care provider about spirometry.

Temagami Showcased at the CNE

By John Santarossa

The Canadian National Exhibition (CNE or The EX as it is also known), is Canada's largest annual community event and lifestyle exhibition. The CNE attracts over one million people annually and is the seventh largest fair in North America. The 2011 CNE ran from August 19 to September 5

and offered a wide variety of entertainment, activities, international food, agriculture, lifestyle, and tourism displays.

Each year, a municipality is featured as "Community Day" at the EX – this year it was **Temagami!**

Economic Development Officer

John Santarossa with Temagami's display booth at the 2011 CNE. Supplied photo.

John Santarossa was at the CNE on Sat. August 20 and Sunday August 21 to promote Temagami and its business community. Temagami's new trade show booth was in a prime location in the Better Living Centre and the municipality received excellent exposure at the event.

Temagami Water Quality *continued from page 1*

hard work, but the real problem is that you also need good (sunny, dry) or at least not windy weather. In a strong wind, by the time you confirm your GPS site and set up the equipment to test you could be on a shoal. Prime time for testing is a clear day before the sun comes up.

*Ted Tichinoff with the Water Sampling Map.
Photo: Trish Healy*

The lesson is that even if you had a crew of motivated testers who were prepared to work as a group over the Victoria Day weekend in May to get the testing done over a three day period, the weather may not cooperate. The better solution is to have testers who are on the lake permanently for the summer period (including May) and who would be able to wait for the perfect conditions for testing.

The bottom line is that it was a learning year and we now have obtained both the expertise and the message to do the work efficiently and accurately. A series of tests were conducted over the summer covering the whole lake. The results will be forwarded to our consultant who will collate them and compare them against the available test results done by various groups in the past. We are hoping to have this year's results and a collation of the best historical data available on our website.

While independent testing by Temagami Lakes Association itself is important, the TLA has to be open to partnerships that could aid in both sharing of equipment and assisting in the cost of the testing, so long as they share with us the same interest in testing. The goal of lake testing remains the same: we need to know in scientific terms

and factual terms where the lake is at, we need to compare that with what earlier data exists to know what changes have been affected and we need to identify trends and changes in the water. If we can identify problems then we can deal with the sources of those problems.

There is little doubt that it is human development and human activity that is going to cause changes in the lake. It is hoped that our test results are going to be some measure of the extent to which further development on the lake is going to have an impact on the lake and whether further development is desirable.

As I indicated in my address at the Annual General Meeting, virtually all test results (there are a few alarming isolated results) indicate that Lake Temagami today is still one of the most pristine lakes in Ontario. The water quality here has been exceptional, but that does not mean that because our water is relatively clean that we therefore have more capacity for decline or should not be vigilant. The measure for concern and action should not be how close we are to the "normal" or "average" phosphorous level for lakes in Ontario. This is I believe an exceptional lake.

We started here with an exceptional body of water. Our approach to the proper phosphorous level has to focus on where we started from and that the relevant measure is from the lake's natural state to some acceptable level of degradation above that. If the lake's original phosphorous levels were, and this is purely for example and is not an actual measurement, at 2 and we are now at 4, that may well be our maximum even if the average lake in Ontario is at 6.

The fact that phosphorous levels in the lake have doubled is the point, not that most lakes have higher levels and therefore we have much more room for further degradation and development. Most other lakes in their natural state have a higher phosphorous level than this lake does even after several decades of septic tanks, motor boats, campers of all kinds and extensive activity on the ice.

In some ways the argument is subtle but I think the proper approach. However, it's one that requires that we know where we come from in terms of water quality, where we are now and where we're going.

MUNICIPAL UPDATE

MUNICIPAL UPDATE is produced by the Mayor and Council of the Municipality of Temagami. Council, in conjunction with the Temagami Lakes Association, has arranged for all its ratepayers to receive these copies of the Temagami Times. The Municipality's participation in the Temagami Times through this page does not imply its agreement or disagreement with any other content in the paper.

MAYOR JOHN HODGSON
MUNICIPALITY OF TEMAGAMI

OFFICIAL PLAN TO GO FOR APPROVAL

Following a very lengthy process and considerable public consultation, Council has now made decisions on all matters to be revised in the municipality's Official Plan. Council has asked that all of the changes decided upon by Council be adopted by By-law at the October 13, 2011 regular council meeting.

Once adopted, the plan will be forwarded to the Ministry of Municipal Affairs and Housing, who is the Approval Authority for the plan. Under provincial law, the Ministry then has 180 days (approximately 6 months) to make their decision on the plan. The Ministry may approve, or refuse to approve the plan in its entirety. It may also decide to amend the plan to correct any matters that do not meet with its approval.

Within 15 days of the Ministry making its decision, it will send written notice to our Municipal Council, who will then advise the public. The Ministry will also directly notify any persons or groups that have requested in writing to be notified of the decision. The Planning Act also provides for a 20-day appeal period, which begins on the date the Ministry gives notice of the decision.

MUNICIPAL BUDGET & PROPERTY TAXES

The 2011 combined operating and capital budget was passed in late June, with a reduction of just over four percent (4%) in total tax revenue. The Municipality achieved the goal of Council to budget for less total dollars in property tax revenue in 2011 than in 2010, even despite the continued increase in the total assessed value of properties in the Municipality.

Due to the disparity of assessment increases, especially in the case of waterfront properties, not all property owners saw a decrease on their tax bills. However for those who did receive an increase, it was minimized.

The Municipality is already starting on the budget process for 2012. Once again, in this budget the Municipality will attempt to control

costs and seek new sources of revenues, however, a similar cut in total property tax revenues is not projected at this point. Council will be reviewing and refining the 10-year capital plan, prior to deciding on guidelines for capital projects in the upcoming year.

SOLID WASTE MASTER PLAN

The Municipality has three landfill sites, four sets of recycling bins, two transfer stations (mine landing wagons and waterfront garbage shed), and curbside garbage collection in urban areas. That's a lot to manage, particularly when considering the vast area and topography of Temagami.

With much of our solid waste system being acquired through amalgamation or instituted as the need arose, the question arises are we delivering the right level of service to our residents and at the same time managing our solid waste in the most efficient and cost effective manner possible.

To achieve the answers to these questions, the Municipality has sought proposals for a Solid Waste Management Master Plan. The Municipality put out a Request for Proposals and the contract has been awarded to AECOM. The project will involve public consultation through various means, and we will be encouraging all residents to participate in this process.

WATERFRONT GARBAGE SHED

One issue of particular concern in the solid waste management master plan will be the transfer stations. The garbage shed at the waterfront by the Welcome Centre was closed for several days in late September due to a bear problem. Following the live trapping of the bear by the MNR, the shed has been re-opened, at least for now. By a divided vote, Council decided to re-open the shed with increased signage intended to reduce the abuse of this facility.

Originally intended for the convenience of island residents in the northeast arm who do not have the opportunity for curbside pickup, it

is to be used for BAGGED, DOMESTIC garbage ONLY. All other types of waste must be taken to the landfill. The shed is not to be used to dump old furniture, windows, or other bulky items, nor should these be left beside the shed.

We remind permanent residents and seasonal property owners, that there is no charge to you to take up to a pickup truck load of this type of garbage, or your bagged domestic garbage, to the landfill sites. We urge all those with curbside garbage pick-up to use that service, not the shed.

While the current intent of Council is to address this issue in the long term through the Solid Waste Management Master Plan, continued abuse of this facility could result in an order to close it coming from the Ministry of the Environment.

COUNCIL MEETING SCHEDULE

The council meeting schedule has been changed and regular council meetings are now held every third Thursday, commencing at 6:30 p.m. Electronic copies of documents to be considered at each meeting are posted for the public to view on the municipal website by 4:00 p.m. on the Monday prior to the meeting (or the Tuesday if the Monday is a holiday).

The council meetings for the remainder of 2011 shall be held on November 3rd and 24th and December 15th. In subsequent years, the first regular council meeting of the year shall be on the third Thursday of January, with regular council meetings scheduled every third Thursday thereafter for the remainder of that year.

Each year the schedule of regular council meetings shall be posted for that whole calendar year no later than the last working day of the previous year and it will be posted both on the municipal website and on the bulletin board at the Municipal Office. Should circumstances necessitate the rescheduling of a regular council meeting for any reason, the schedule for the remaining regular council meetings for that year shall not change.

DRAFT MOTIONS FOR COUNCIL MEETINGS

Since April of this year, the regular council meeting agenda packages that are posted on our website have included a list of proposed motions to be considered at the upcoming meeting. For some residents, this has created some confusion. We would like to make it clear that these are only proposed, DRAFT motions that have been prepared in advance by staff, based on the reports, by-laws and correspondence on the prepared agenda. They are simply intended for the convenience of Council and to expedite the transaction of Council business. Councillors review these draft, proposed resolutions in their council packages in exactly the same manner that they are provided to the public.

If Councillors so choose, immediately prior to the commencement of the meeting, they sign pre-printed sheets to move or second the motion. If a proposed draft motion is not moved and seconded, it will not be considered. It is important for the public to be aware of the process and that they understand that these matters are not debated or decided prior to the actual council meeting. Furthermore, Council regularly chooses to change or defeat motions during the course of the council meeting. Additional motions are also made during the course of the meeting where no draft motion was anticipated in advance.

COMMERCIAL PERMIT FEES REDUCED

Finding new ways to stimulate business growth and development in Temagami is important because growth in the commercial and industrial sectors generally creates an increase in jobs as well as economic spin offs for the community. Additionally, expansion in these sectors is one way of taking financial pressure off residential taxpayers.

As important as it is to stimulate economic growth, it can be a difficult thing to accomplish. Our Municipal Council recently reduced by half the building permit fees for commercial and industrial for the remainder of this Council term. This, in conjunction with the fact that our Municipality does not charge business licence fees, should be an incentive for businesses wishing to locate or grow in our community.

PAC MEMBERS NEEDED

The Municipality is seeking individuals who are interested in sitting on the Planning Advisory Committee (PAC). We are hoping to fill the full compliment of nine members on the committee as set out in our official plan and committee by-law, with the specified numbers of representatives from the various neighbourhoods. Please note that all residents and

property owners, permanent or seasonal are eligible to be appointed to this advisory committee; one does not need to be an eligible elector. Remote participation by phone or Internet is also possible. Members of the PAC, if eligible electors, may also be appointed to the Committee of Adjustment. For more information, please contact Municipal Planner, Jennifer Sandham at the Municipal Office or by email at planning@temagami.ca.

MICROFIT

In the search for new sources of revenue, the Municipality investigated the feasibility of a MicroFit contract for the production of solar energy. The Ontario Power Authority (OPA) developed incentive programs for solar energy projects, namely the Feed-in-Tariff (FIT) or "microFIT" for small roof-mounted solar projects. Under such a contract we would be paid for the solar energy we produce at a set, guaranteed rate for 20 years.

When the Municipality investigated this opportunity, the assessment indicated that although a capital outlay of close to \$100,000 would be required, it should be paid back within 6 years and in subsequent years would produce additional revenue for the Municipality.

The Municipality applied and was granted an OPA contract and Hydro One offer to connect at 5 Stevens Rd, (Temagami Fire Hall). Council has approved a Request for Proposals for the equipment and installation required. Once they have been received Council will determine whether or not it would be feasible to proceed with this project.

VISIONING SESSION

What will Temagami be like in 5, 10 or 20 years? Without a vision of where we want to be we cannot know if we are on the right track to get there. Of course we have just completed reviewing our Official Plan that deals with land use planning matters, and have recently completed an Economic Development Strategy that deals with stimulating economic growth, and soon we will be developing a Solid Waste Management Master Plan, but all these are just several parts of the big whole. The big, global questions can only be addressed through proper strategic planning.

We need to confirm the overall mission of the Municipality. We also need to confirm what our core services are and address how we can best focus our limited resources to deliver them. These are the types of things Council will address in a visioning session to commence the formation of a strategic plan for our Municipality. This session will be held in early November. Although the Municipality has

previously sought public opinion on a variety of topics, written comments from residents and property owners on strategic priorities are encouraged in advance of the meeting for Council's consideration. Comments should be confined to strategic issues and priorities in order to be considered. We would prefer that comments be submitted by email to visit@temagami.ca with the subject line "Visioning Session", but they may also be sent by fax or mail or dropped off at the Municipal Office.

LUPUS AWARENESS MONTH

During the month of October, people will be working across Canada to raise awareness of a disease that strikes over 1 in 1000 Canadians. At the request of the Lupus Foundation of Ontario to assist in this public education campaign, Council has declared October as Lupus Awareness Month in Temagami, in conjunction with similar declarations of many municipalities across the province. Lupus is a chronic autoimmune disease that causes inflammation of various parts of the body. It is quite common, but not infectious. The Lupus Foundation of Ontario promotes public awareness as well as providing support and assistance to lupus patients. For more information, please visit their website at www.vaxxine.com/lupus or pick up an information brochure at the Municipal Office.

ONGOING PROJECTS

Municipal Council and Staff continue to press forward on a number of ongoing matters of concerns to residents. We are pleased to report that work to date on promoting the zip lining business case has garnered serious interest. We are working toward making this opportunity a reality in the near future.

We have been advised that improvements in cell phone service are also coming closer to fruition. The Province of Ontario announced in June a commitment to two new cell phone towers in Temagami as part of a large communications project to be completed by the end of 2013. The Province has not yet confirmed the schedule for the Temagami portion of the project and the Municipality continues to push for this to occur as soon as possible.

Winter will be here again soon and winter maintenance on Highway 11 remains a priority. The Ministry of Transportation of Ontario (MTO) has finished the report on their findings and Mayor Hodgson and CAO Patrick Cormier are scheduled to meet with MTO officials in October to discuss this matter.

Working for Temagami's future... Together!

Did You Miss Them This Summer?

By Chip Kittredge, Island 1158

Did you miss their silent, acrobatic flight over the still lake at dusk this summer? Did you not have as many tell-tale droppings on the porch or cottage floor revealing the presence of visitors the night before? Was there something different about your Temagami experience this summer with fewer or no bats at the cottage?

Eight different species of bats live in Ontario. The most common is the little brown bat. We all know some of the biology of bats: they hunt at night, flying generally near or over water catching insects.

They can catch 600 to 1,000 mosquitoes per hour, and can keep insect populations under control. Bats can consume between 50 and over 100 percent of their body weight in insects each night during the summer. When nursing her young, a little brown bat needs to consume her body weight every day (equivalent to about 5,000 mosquitoes).

Bats also prey on moths, mayflies, cad-

dis flies, midges, lacewings and gnats. It's pretty impressive, really, that they can catch bugs at night, while flying, and they do so using high frequency sounds as a way to find prey and dodge obstacles.

In the summer, big and little brown bats roost in groups and raise their young in cavities of trees or snags, often using the same tree year after year. Hibernacula, such as caves provide hibernating areas during the winter. There are no insects available in the winter, so it is important for bats to have a place to hibernate and be dormant until the following summer. These sites are critically important to the long-term survival of regional bat populations.

But these caves and other places to hibernate during the winter are now proving to be a serious problem for bats. In the winter of 2006, bats hibernating in a cave near Albany, New York were discovered to be dying from a disease known as White Nose Syndrome, named for the ring of white fungus (which appears as a

powdery substance) often found around the bats' nostrils and muzzle.

The fungus itself doesn't kill bats, but it disturbs their hibernation patterns, causing them to wake earlier than they should. Once up, the bats can't find the moths and mosquitoes they usually eat. After expending their limited stored energy in the cold winter weather, they starve.

White Nose Syndrome is proving lethal, typically killing between 80 and 99 per cent of bats within a single hibernacula. Since caves aren't all that common, thousands of bats typically congregate in these special habitats every winter exposing most bats to the fungus. Researchers are working on ways to inoculate bats, but so far there is no treatment or cure.

Since first recognized in 2006, White Nose Syndrome has spread to 11 states, from New Hampshire to Tennessee. It was first discovered in Ontario in 2010 at an abandoned mine in the Bancroft-Minden area, west of Ottawa. Since then the fungus has been discovered in Peterbor-

ough, Hastings, Grey and Renfrew counties, and in Kirkland Lake. In 2011, the syndrome was confirmed in bats from the Timmins, Wawa, Mattawa, Simcoe, Peel, and Halton areas.

Ontario's natural resources ministry is monitoring the disease with the Canadian Cooperative Wildlife Health Centre and trying to reduce its spread by asking people not to go into caves that could be inhabited by bats. Nobody's sure how the fungus spreads, but there's some concern humans may play a part, so the ministry has asked for a moratorium on recreational caving.

Given the way the Syndrome has spread, and the high mortality associated with it once it reaches caves, some biologists are even discussing the possible extinction of some species of bat. This would be ecologically devastating, since bats play an important role in the food chain preying on insects, and they are an important part of the complex web of the

The Art of Jigging For Lake Temagami Trout

by Linda Cain

If you want to catch lake trout in Temagami, give vertical jigging a try. Down rigging and "pulling" wire produce results, but both are a bit boring and time consuming. I have caught 6-inch to 41-inch trout while jigging.

Lake trout live in the depths of Lake Temagami, 80 feet to 120 feet deep. They are feeding on herring. So, if you can find clouds of yellow bait on your fish finder you can bet that lake trout are feeding in their midst.

To be successful at jigging, you need the proper equipment and set-up. I use a medium action 6-foot, 6-inch rod and a Daiwa Accudepth Plus 17 LC reel loaded with 8-pound test.

The proper lure is key to catching trout. I use a handmade lure that looks like a small herring. It weighs about 1 ½ ounces. You can buy similar lures at Bass Pro Shops. They are called Lazer Eye Minnow Spoon - 1 oz. If you ever find the lure in a 1 ½ oz. size – buy it!! The heavier lure falls faster in the water toward the trout. My favorite colors to fish with are silver and light green.

To set up your line you will need a double barrel swivel. Cut off 12 inches of line and tie the swivel to one end. I use a knot called a Eugene Bend knot; it does not come undone. Tie the other end of the swivel to the end of the line on your reel. Tie the lure to the bottom of the line. You should have your reel line, swivel, 12 inches of line and lure.

A good fish finder is a must. I use a Lawrence X510C. The detail I get on the fish finder is amazing. After several summers of use, I can tell the herring from the trout on the screen. It is a thrill to drop your line into the water and watch a trout go after your lure. I use a counter reel for more accuracy as I drop my line. I look at the fish finder, spot the fish and know exactly what depth I should go to.

Try to jig in calm waters. Your line must fall straight down and stay straight down. Make sure the stern of the boat is into the current or wind. With your fish finder on, slowly troll an area of the lake that is at least 80 feet deep. As soon as you spot the cloud of bait or a single fish mark, stop the boat, back up, and then drop your line.

Jigging involves bringing your rod up about 3 feet and slowly dropping the rod and line down. You want the line to float down, so the trout think the lure looks like a wounded fish. Quickly up, slowly down. Stay in one area for no more than 10-15 minutes, if the fish are not biting, move on. Many of the lake trout are in the mud at the bottom; drop your lure down to the bottom to draw the fish up.

I do catch a lot of herring using this method of fishing. I have kept the larger ones and, properly filleted and pan-fried, the fillets are delicious.

Give jigging a try. Constantly watching the fish finder, keeping the boat steady and watching a 5-pound trout hit your line are thrilling and the end results are very tasty.

Linda Cain with her catch, a 5-pound lake trout. Photo: Dave Cain.

A FAVORITE TROUT RECIPE:

Baked Trout with Tomatoes, Spinach & Mushrooms

- 4 trout fillets with skin on
- 2 cups chopped fresh spinach
- 1 cup sliced mushrooms
- 1 medium tomato – chopped
- 1 cup Kraft Collection Sun Dried Tomato Vinaigrette Dressing

Place trout skin side down in a 13 x 9" baking dish that has been sprayed with no-stick cooking spray.

Mix remaining ingredients until well blended, spoon over trout.

Bake at 375 degrees for 20-25 minutes or until trout flakes easily with fork.

About 200 calories per serving.

Who Knew?

By Diane Taylor

It was a perfect golden orb of a pear. Just at the peak of ripeness, it sat on the kitchen table in all its glory: a gift from Mamoo, fresh fruit at the lake, waiting to share its sweetness at tomorrow's breakfast. Since it was a lovely lake evening, just this once we decided to leave the front porch windows open overnight. We'd recently put in all new screening, so we had no worries that anything could get in during the next few hours. Silly us.

As I came down the path just before daylight I heard a thud from the kitchen cabin, scurrying and another thud. That couldn't be good. I was coming up the steps just as a shape flew through a front porch screen. At a full run as I entered the cabin, I flew out the back door as the shape started up a tall pine. I was pretty impressed with how fast the mystery critter got so high in the tree so quickly.

Since it didn't look like it was going anywhere for a minute I ran back in the cabin to check the damages. What I found sent me right out to the base of the tree to shatter the peacefulness of a beautiful morning. "That was NOT your pear! Mamoo gave that to US! Shame on you! You'd better never come down from that tree or you're STEW, you rotten raccoon!"

Returning to the crime scene I again saw the pear still on the kitchen table, or rather half the pear. Rotten had feasted. But how had Rotten gotten in?!

Checking the screen it had gone out showed no rips or tears. It did show spline

Photo: Wisconsin Department of Natural Resources.

hanging loosely on the lower corner of the screen. Huh? Raccoons can't remove spline? No way. That would be crazy!

Not so much, as we discovered the next morning. We'd replaced the screening, snugged in the spline and reinstalled the screen then made sure to slide and lock all the windows for the night. But once again spline was hanging loosely from the screen corner and screening was loose. Indeed Rotten had worked the spline ends loose where they met. Very handy, those opposable thumbs, eh? We finally solved the problem of illegal entry by rotating the spline ends up high. But we needed to find Rotten a new home.

Fortunately raccoons like barbecue even more than pears, even if it's in a cage trap. We relocated Rotten to a lovely site on the McLean Peninsula. Who knew raccoons growled when they were annoyed?

Did You Miss Them This Summer?

continued from page 16

nature of Temagami.

At this point, what we can hope for is that some bats prove to be somehow genetically resistant, that they can weather this disease, and spread that

resistance to future generations. In the meantime, we can appreciate the diversity that bats add to Temagami, and hope we see them again on still nights in the summer of 2012.

Need a Duplicate Operator's Card?

By Angus Scully
Chair, Marine Committee

When you are out in your powerboat you must have with you the original of your Pleasure Craft Operator's Card (PCOC). The fine for not having it is \$250.00. This past summer this requirement was enforced by police and TLA members were fined!

Many members have expressed frustration with keeping track of where their PCOC is when they have several boats. Thanks to Dora Young for passing on the information that you can get duplicate cards.

Just look on the back of your card for the phone number of the card-issuing agency. Call and order up to 5 duplicate cards. The Canadian Power and Sail Squadrons (1 888 277 2628) will issue the first replacement for \$25.00 – with price dropping for each additional card up to 5.

At the same time, remember that your PCOC is an official form of licensing and you should keep it secure. Report loss or theft to the issuing agency. Keep a separate record of your PCOC card number and the name and phone number of the issuing agency.

Loon Report 2011

by Jim Hasler, Island 817

Loons seemed to be holding their own this year on Lake Temagami. A number of people reported at the end of June that there were no nests in their usual locations due to high water levels, but the birds seemed to have found other suitable locations, because reports of babies started trickling in by the end of July.

By the end of August, I had heard of 12 baby loons at locations scattered across the whole lake. There were some sighted that were a good size and diving early in August, as well as a few newly hatched. The late hatches would still have a fairly good chance of survival this year with the continuing mild weather in September.

We haven't had a baby loon in Cross Bay for several years since one-half of the dominant pair, who regularly fledged twins for a decade, didn't reappear in the spring. A new pair was around this year and nested, but something happened to the chick. I found half an eggshell in late August but there was no sign of the chick.

The pair of adults is swimming together and we hope they will be here next year.

The Canadian Lakes Loon Survey is now gathering reports from across the country. The final tabulation won't be available until January, but the early checking seems to indicate a good year overall. There have been no reports of West Nile cases or any other widespread infections in loons.

If any readers have news about loons that I didn't get by phone, please phone me at 237-8665 or email jhasler@ontera.net.

Temagami Lions Club Reaches Goal for "Jaws of Life" Funds

Thanks to the hard work of the Temagami Lions Club and the generosity of the Temagami community as a whole, the "Jaws of Life" target of \$18,000 was raised in one third of the time anticipated.

In the fall of 2009, the Temagami Lions Club had discussed the need for updated auto extrication equipment for the Temagami Fire Department with Temagami Fire Chief Jim Sanderson. The heavy equipment needed to tackle the material used in some newer vehicles would be a great benefit to the department, which previously had to wait for the Marten River or Haileybury fire department's equipment for some highway accidents.

Chief Sanderson had an opportunity to obtain \$30,000 worth of new, stronger equipment at a special dealer's price of \$18,000, so the Lions Club decided to take on the project. The Lions arranged for the Municipality to purchase the equipment, with the Lions Club committing to reimbursing them at \$3,000 per year for six years.

Now, thanks to the community's great response to the Lion's "Jaws of Life" fundraising efforts, the Lion's Club has paid the full amount to the Municipality in only two years. Lion's President, Wayne Adair, presented the final cheque to Council at the September 1, 2011 council meeting.

Redwater – Temagami's Ghost Town

By *Dustin Roy*

Redwater was a small, remote village along the Ontario Northland Railway between the town of Temagami and the hamlet of Marten River. Like many other communities built along the Ontario Northland Railway in the early 1900s, it was short-lived. In 1903, the railway arrived on the shores of Lower and Upper Redwater Lake. During the same year, a section village containing a small train station, telegraph key, a siding and water tower was created. The train station or bunkhouse was reserved by railway men who were posted at Redwater. Two section homes were also created, one of which was reserved for the foreman.

In 1909, Redwater was the site of a horrific murder. It occurred when two railway employees named Morin and Cornish assaulted W.J. Dyston, who served as the telegraph operator. He collapsed and died while trying to telegraph for help. A few years later, the Redwater Lumber Company created a

small sawmill on the shores of Upper Redwater Lake. To export the wood cut at the sawmill, the lumberyards were situated within close proximity to the train station. Another bunkhouse was established and at least 10 homes were created along the railway.

In 1916, resident T.J. Baker opened a store and post office. The Redwater Lumber Company sawmill stopped operations around 1928 but the village still had a steady population. To provide education for the children, a school railway car visited the village from the 1940s up until the 1950s. By this time there were about 5 section homes left, as well as the section village. However, without the sawmill it was only a matter of time before Redwater's residents left forever. In 1942, the post office was closed. The homes were demolished and the last remaining home burned in the 1950s, with the water tower burning down in 1957.

To this day, not much remains of

the village of Redwater. Cement foundations, a few cellar holes and some evidence of early land disturbances are the main remnants of the village, now hidden in thick overgrowth. A standard aluminum shed for railway workers sits on the original site of the train station. Observant ghost towners may find a toilet sitting in the forest, most likely the site of a section house. The mill yard was located opposite of the train station. Here, holes from where the original support beams once stood can be found. Cottages built in the 1960s are still used seasonally. Redwater is now an unincorporated area in the municipality of Temagami.

Redwater can be accessed by taking Rabbit Creek Road north of Marten River. Drive across the railway crossing. Beyond the crossing, about 3 kilometers is a gated road on the right, which leads to the Rabbit Creek ballast pit. Follow this road to the railway where you will walk 3 miles south to the abandoned

townsite. Redwater can also be accessed by taking a canoe down Upper Redwater Lake, which is about half a kilometer down the railway from near the Rabbit Creek ballast pit.

CHANGE YOUR CLOCK, CHANGE YOUR BATTERIES

On November 6, you set your clocks back one hour. When you change your clocks, change the batteries in your smoke alarms too!

Art Camp is a Rewarding Experience for Volunteers Too

by Elaine Gunnell

The July morning was sunny, if a little cool, as my eight-year-old grandson, Kurtis, and I gathered with the small, yet growing, group of children and councillors at the Mine Landing docks. We were both excited and a little bit nervous as we eagerly watched for the promised boat to arrive. It would take us to the summer art camp sponsored by the Temagami Community Foundation and Bear Island. For some of us, it was our first time at camp.

The nervousness quickly melted however, upon our arrival at Bear Island. The beautiful setting was serene and friendly. For the rest of the week, we would get to know more of Bear Island; its beauty, its people and their customs.

We soon joined in with the others in the recreation centre, where for the next week we would meet each morning as a group. We were introduced to Camp Director, Bettina Schuler who,

after emphatically spelling out the camp rules (to ensure everyone stays safe), soon had the children participating in fun activities. We learned a song about a bear named Claire and a moose named Bruce, and some other camp songs, and then divided into groups for the art projects.

Our group, worked with a variety of media throughout the week. Collages on a variety of themes; pigs made out of paper mache; paper plate rattles; pompom and pipe-cleaner creatures; and goose decoys made of Styrofoam, wire, yarn and feathers were the creations that emerged as the week progressed.

It continued to amaze me each day, how the dozen children in our group could be provided with the exact same supply of art materials and project guidelines and yet come up with such vastly different and unique results. But it isn't just the art projects that emerge and grow at art camp; it is also the peo-

ple themselves.

The kids were provided with opportunities to have fun, play, sing, interact informally, and learn. I could truly see the wisdom in Bettina's concept of the children learning together about their cultural differences and their common humanity in a positive environment. It's not just the children who benefit though. As I spent many hours that week on Bear Island interacting not only with the children, but the other councillors, leaders, elders, guests and volunteers, I also came to have a greater appreciation of these things.

By the end of the week that went by all too quickly, children who had never even met before were acting like lifelong friends. First time campers had gained the confidence of seasoned veterans. Youth councillors had gained valuable leadership experience. Even the adult volunteers, seasoned or new to art camp, had enjoyed a truly rewarding week.

Those people and organizations who make this annual Summer Art Camp happen – Camp Director Bettina Schuller, the Temagami Community Foundation, the Bear Island Councils, the guest presenters, and of course the art camp councillors and volunteers – deserve great thanks for making this wonderful experience available to the children each year at no cost.

If you have ever thought about volunteering at art camp, I would definitely encourage you to do so. You don't need to be an artist; you just need to enjoy working with children,

As the yellow school bus rattled along the Lake Temagami Access road at the end of the last day, Kurtis, with his folder brimming with art projects was suddenly quiet. A quick enquiry informed me that he was just sad that Art Camp was over so soon. I was a little sad too, but I was also already busily thinking about volunteering again next year.

Dream Catcher Express 2011

Temagami hosted the 7th annual Dream Catcher Express on Sept. 23, 24, 25, 30 and Oct. 1 and 2. This year over 550 riders took in the fall colour excursion train from North Bay to Temagami.

The Dream Catcher Express features a dome car, professional entertainment, and a licensed snack bar. The captivating train excursion allowed passengers to view brilliant fall colours through large viewing windows in comfortable passenger coaches.

“The Dream Catcher offered a tremendous opportunity to showcase Temagami and visitors experienced local culture, dining, and guided tours,” says Mayor John Hodgson. “Residents and local

business came together to roll out the welcome mat – for example, Leisure Island Houseboats provided tours on the lake and other visitors took in a traditional Aboriginal experience and lunch at the Chalet”.

Economic Development Officer John Santarossa said, “it was a great opportunity to showcase Temagami. In fact, the train was sold out on both Saturday October 1st and Sunday October 2nd with 150 riders each day”.

The train proved popular to both young and old and passengers commented on the beautiful scenery in Temagami, in addition to the train’s popular dome car and the on-board entertainment.

Barry Phippen Recognized for Outstanding Achievement for Volunteerism

On Friday April 15, 2011 as part of National Volunteer Week, the Province of Ontario recognized Barry Phippen with the prestigious June Callwood Outstanding Achievement Award for Volunteerism. The award recognizes leadership, innovation and creativity in volunteerism and community service.

The late June Callwood was a journalist and author who devoted countless hours to issues facing children and women. She was one of Canada's most well known social activists founding or co-founding more than 50 Canadian social action organizations.

Five million Ontarians volunteer more than 800 million hours annually – equivalent to 420,000 full-time jobs. Of these volunteers, the Province honoured the commitment and

community service of 12 individuals and 8 groups. Minister of Citizenship and Immigration Dr. Eric Hoskins addressed the recipients at the formal ceremony "Ontario's five million volunteers truly are the heart of our communities. Their vital contributions help maintain our quality of life in Ontario. This award recognizes their commitment to building vibrant communities and a stronger province for all of us."

The desire, drive, determination and vision of Barry Phippen is the catalyst in making the New Liskeard Bikers Reunion the premier Motorcycle Event in Northern Ontario.

Press release submitted by James Franks, Economic Development & Funding Coordinator, City of Temiskaming Shores

Yellow Signs Show Temagami Supports Cancer Care

Once again this summer the town of Temagami was decked out with bright yellow signs. More and more seem to appear each year in support of the ever-growing New Liskeard Bikers Reunion. Each sign is displayed in recognition of a donation of support to the Bikers Reunion fundraising for cancer.

Did you ever wonder how this event got started? Initially it was a one day event in 1999 as a fundraiser for cancer and as a community event celebrating the thrill of riding motorcycles.

In 2004, the reunion became an annual event. It was moved to a bigger venue, the New Liskeard Fair grounds and after several additions and expansions become what is known at the Bikers Reunion. This year 2011, the Bikers Reunion donated \$102,000.00 to the Cancer Care Unit at Temiskaming Hospital, making the total donated to date \$587,000.00.

Thousands of bikers and non-bikers come to this family oriented event from all over North America, Europe and beyond. In 2011 there were over 6,000 bikes, and 25,000 spectators.

The Event has two main goals. The first is to be a fun, family oriented weekend celebrating the sport of riding motorcycles. The second, and equally important goal, is to be a fundraiser to help people who are battling cancer through the Temiskaming Hospital Community Cancer Care Unit.

The committee, chaired by Barry Phippen, is a group of dedicated volunteers who give a great deal of time and effort to the cause. They share the vision of what this event can be, and give tirelessly to make the Bikers Reunion a success.

Although we have opposed the site plan control from the beginning and still do, until a decision is made at the municipal level, we are going to provide this service hoping it will alleviate some frustrations and give you a chance to enjoy your vacation.

We Specialize in:

- Septic system design and installation - help with permit application
- Landscaping - sand, gravel, topsoil, crib rocks on request
- Equipment of all sizes needed for excavation and site development
- Rock drilling equipment - blasting expert available if necessary
- Freight of all kinds, delivery
- Water pumps and water treatment systems installation
- Complete project development or renovations of cottage
- We are now offering to fill all permit applications and site plan control map for our clients

Temiskaming Health Unit Celebrates 60 Years of Service

Congratulations to the Temiskaming Health Unit (THU) as they celebrate 60 years of public health service this year. From testing tap water to septic system inspections, from flu shots to food handling certification courses, the THU puts a lot of effort into looking after the health of the community and its residents.

The mandate of the Temiskaming Health Unit is to promote good health, prevent illness, and to protect against health problems. The THU is a non-profit organization funded by municipalities, with each municipality contributing based on its population (per capita).

Board of Health Chair, Carman Kidd says of the anniversary, "This is a chance for us to share our milestone with the public and show them how much we appreciate their support over the years."

It is also a chance to look back at the Health Unit's history.

A Health Service was first started in the Kirkland Lake District in 1928. The local Board of Health brought on Dr. Armstrong as part-time Medical Officer of Health and hired the first nurse. As the population increased, two additional nurses were hired.

The first plans for a Health Unit were adopted in January 1945. The plan for staff included a full-time Medical Officer of Health, a Nurse Supervisor, four Public Health Nurses, and one full-time and one part-time Sanitary Inspectors.

Services provided by The Kirkland-Larder Lake Health Unit, in 1945, were prevention of acute communicable disease; provisions for the prevention and control of chronic communicable disease; environmental sanitation including water supply, sew-

age, and refuse disposal; pre-and-post natal services; supervision during infant and pre-school stages; elementary and secondary school health supervision; food control; and supervision of old age pensioners.

On July 1, 1951, the Kirkland-Larder Lake Health Unit expanded to cover Ramore to Cobalt and Elk Lake to the Quebec boarder. The name was changed to the Temiskaming Health Unit from there it grew to incorporate all municipalities and unorganized townships in the Temiskaming district, including Temagami.

When the Temiskaming Health Unit started in 1951, staff included a full-time Medical Officer of Health, a Nurse Supervisor, six Public Health Nurses, two part-time Victorian Order of Nurses, one Public Health Veterinarian, two part-time and two full-time Sanitary Inspectors, and three

secretaries.

Some important milestones in the THU's history include:

- The Mental Health Program began in 1968 with the hiring of a mental health worker in Kirkland Lake as part of a pilot project. The program soon extended to the Tri-Towns with regular psychiatric clinics.
- An Addictions Assessment Program was added to the Mental Health Program in 1986.
- The Temiskaming Health Unit website (www.timiskaminghu.com) was developed in 1999.
- In May 2005, the New Liskeard office relocated to the Temiskaming Hospital.

A comprehensive list of the services provided by the Temiskaming Health Unit, including classes and clinics, and additional information is available from their website.

ATTENTION

Future Journalists/Lake Community Archivists

The Temagami Times needs reporters/columnists from all corners of the lake to share their experiences, events and/or lake history. We will print submissions, subject to the usual editorial review. Students may want to contribute items as part of courses or to obtain community volunteer credits.

Ethanol Free, Premium Grade

As you know, TM served "Ethanol Free, Premium Grade" gas this year. One hundred percent of our customers, both resident and transient, have congratulated us on that move.

Engines ran better and people were confident in our approach. Similarly, many followed our suggestions with respect to installing water separators and frankly, they noticed how our customers had no water related problems. For those who did not pay attention to fuel supply and Ethanol in the gas we helped them with quick repairs.

FIXED RIGHT FIRST TIME

"Fixed Right First Time" and "Quickly" are two maxims that are very important in this industry. The boating season is short and people want to be on the water versus waiting for repairs. I am extremely pleased to report that a greater percentage of people in our trading area (we actively service customers on ten lakes) were back out on the water faster this year than in the previous four years of my tenure and that they enjoyed the great 2011 summer weather.

The reason for the above is simple. TM invested in improving its service team both in personnel and training of same. We also followed up with informal surveys (certainly our first!) by telephone. Scheduling was improved. As a result, we were able to get people in and out, often on the same day.

One of the tasks I enjoy is passing on the accolades to the team members directly responsible for the effective and efficient service. It builds strong relationships with you our supporters.

MISSION: SUCCESS!

MOVING FORWARD

Thank you for all your support and concern during the last four months. The management driven initiatives undertaken during last year have paid off. In any business, inventory management is one Key Success Factor (KSF). Many have noticed how our showrooms are virtually empty. We were assertive in both our marketing and our pricing and it has delivered the desired outcome. Despite the 4th consecutive year of low industry wide boat and motor sales, we at Temagami Marine (TM) have managed to essentially clear out our new units. Others in the industry around us have not focused on this aspect and have now closed their doors forever, on a voluntary basis or otherwise. This positions TM well to begin the year 2012 with fresh inventory while others will be working off their significant non-current inventory position.

Temagami Marine is evolving both its business and sales model as previously outlined in the Summer 2011 edition of the Temagami Times. I mentioned that this "may even include new product lines that are more appropriate for this and future markets". TM is negotiating with manufacturers to place different models on our showroom floors (utilities, side consoles, dual windshields and pontoon boats) that we will sell from. These units will be fully rigged and available for water tests. As you and I agree on a specific model and with the options you desire, we will then place the order with these manufacturers and be able to deliver the boat within weeks. Now that's exciting! The exact unit you want, at a price that is acceptable to us both (without the inventory risks and costs for TM) will be a win-win situation. Watch for further announcements on that front.

Do we have more work to do? Absolutely! I feel we need to reinforce the Value Proposition (not necessarily the lowest cost but the best value- what you get for what you pay). This includes greeting our friends with a smile, listening to you with interest as well as introducing our service team to you so the members are increasingly invested in completing their tasks with pride. There will be further training for service writers, technicians as well as leadership training. We will reinvest in software and hardware to be able to track service histories and to be able to respond to your ongoing needs, again, better and faster.

Our team will be contacting you this fall to offer suggestions with respect to bellows, impellers and preventative maintenance. The goal is to have you enjoy even more time on the water through scheduled maintenance.

Finally, it has been my responsibility as steward of Temagami Marine to re-set the foundation. I inherited 50 years of successful history but the world has changed, we all know that. The Business Model that I see appropriate for this organization is one that has both retail and manufacturing components; manufacturing of a product that is accessory to its present business and is also a continuance of what we are already doing on the repair side. I am now in the process of acquiring assets in order to produce a line of 12' to 16', aluminum, riveted boats. TM has excess infrastructure that is suited for this project. We will be able to add seven (7) new jobs and convert four (4) seasonal ones to year round ones. This will permit us to commit to tier one talent because of the permanent nature of the employment. It is absolutely essential for the community and its fabric...there will be a sense of revival in the area, one that's been missing for a long time. For TM, it will diversify its income stream between sectors, across regions (the plan is to have a dealer network from coast to coast and in some Northern States) and across various periods of the years compared to the status quo. We will then hire the best people we can find and invest in their training. The strategy is to have a well balanced enterprise, one that you can be proud to be associated with. Stay tuned for more news on this front. For those not on our e-mail list please request to be added by contacting us at 705-569-3221 or info@temagamimarine.com.

I want to close this edition by thanking each and every one of you who have listened to us, encouraged us, believed in us and trusted us to do the right thing.

The future is brighter!

Andre
