PUBLIC NOTICE

Effective Immediately – Changes to Lake Temagami Access Point Waste Transfer Station

The Municipality wishes to advise all residents and commercial businesses that changes to municipal waste and recycling services are effective immediately.

These changes are being implemented to improve waste diversion, extend landfill life expectancy, reduce contamination, and ensure the long-term sustainability of municipal waste management services.

Effective immediately, the following requirements apply:

- All residential and commercial domestic waste and recycling must be placed in clear plastic bags only, with a maximum size of 75 litres and a maximum weight of 40 lbs per bag.
- The metal and wood bin will no longer be available at the transfer station. All metal and wood must be transported to the Briggs Landfill site.
- Bag tags will be introduced on the Tuesday following the Thanksgiving weekend.
- The Municipality will not be providing a commercial recycling bin until further notice.

The Municipality appreciates the public's cooperation as we implement these changes to support a more efficient and sustainable waste management system.
