

NOTICE TO NAVIGATORS

Lake Temagami - South of Island 665

Spill response activities are occurring in the waters south of Island 665 on Lake Temagami.

Containment booms and associated equipment may be deployed around a submerged loader to contain intermittent hydrocarbon releases.

Boaters, paddlers, anglers, and other waterway users are requested to avoid the area and maintain a safe distance from all containment equipment and response operations.

Reduced speeds are requested when travelling nearby to prevent disturbance of containment measures and to ensure the safety of response personnel. Navigation markers and lighting will be installed as required to identify the affected area.
